EDUCATION

July 2023 | **Treehouse |** Front End Web Development

Sept 2012 | **Miami International University of Art & Design |** Bachelor of Science in Audio Production

SKILLS

- HTML5
- CSS3
- JavaScript
- SASS
- BootStrap
- Git
- GitHub
- JQuery
- Responsive Web Design
- Accessibility

MY PROFILE

My interest in front-end web development began the moment I wrote my first line of code. Creating websites that are both aesthetically pleasing and functional has presented an exciting challenge for me to continually learn from and improve upon. Initially just a spark of interest, it has since grown into a full-fledged passion that only grows more exciting with time. The projects I've created that showcase my skills and basic front-end web development knowledge are listed below. You can also view my portfolio at the provided link.

EXPERIENCE

Employee Directory

View Project

Employed a random user generator API to collect randomized employee data, which was then used to create an employee directory.

- HTML, CSS, JavaScript, and a third-party API

WebApp Dashboard

View Project

Built an interactive dashboard for a web application using advance web techniques including SVG graphics and JavaScript programming.

- HTML, CSS, and JavaScript
- Involves creating tables, charts, graphics, and other user interface components in a manner that promotes interactivity and usability.

Game Show App

View Project

Created a browser version of "Wheel of Success", a word guessing game that utilizes JavaScript to come up with random phrases that players will try to guess by entering letters into the program.

- JavaScript

Interactive Photo Gallery

View Project

Utilizing CSS grid and flex-box, I created a searchable, interactive photo gallery that filters photos according to the search.

- HTML, CSS, and JavaScript

HELLO !

Are you searching for a software engineer with a proven ability to develop high-performance applications and technical innovations? If so, please consider my enclosed resume. Since 2010, I have served as a software engineer for Action Company, where I have been repeatedly recognized for developing innovative solutions for multimillion-dollar, globally.

I am responsible for full lifecycle development of next-generation software, from initial requirement gathering to design, coding, testing, documentation and implementation. Known for excellent client-facing skills, I have participated in proposals and presentations that have landed six-figure contracts. I also excel in merging business and user needs into high-quality, cost-effective design solutions while keeping within budgetary constraints. My technical expertise includes cross-platform proficiency fluency in 13 scripting/programming languages and advanced applications, methodologies and best practices.

My experience developing user-friendly solutions on time and on budget would enable me to step into a software engineering Company.

YOUR SINCERELY
